

Bringing the **science** of today to the **medicine** of tomorrow

Introducing an innovative new benefit program!

Through Genomic Life, you will have access to proactive genetic tests that will unlock insights into your inherited risks for cancer and other diseases. When you sign-up, the [Genomic Life Platform](#) provides you with access to clinically relevant genetic testing and specialized services, including:

Genetic Health Screen

An accurate, medical-grade DNA test that analyzes 147 genes to identify a predisposition to developing hereditary cancers, cardiovascular diseases, and additional conditions.

Pharmacogenomics (PGx)

Helps uncover how an individual metabolizes and responds to medications. This knowledge helps reduce an adverse drug reaction and increase drug response.

Carrier Screening

Identifies a potential risk of having a child affected by a recessive genetic disease.

Personalizing diagnosis and treatment for cancer patients

Should you or your family member face a cancer diagnosis, our cancer services team will provide personalized support throughout the course of treatment, including such steps as:

- Nurse advocacy
- Comprehensive genomic profiling
- Peer-to-peer physician consult
- Expert pathology review
- Much more

Why genomics matter

For the first time in history, people can prevent disease before it happens, diagnose disease more accurately and treat patients better based on their specific genetic makeup.

Prevention

Identify risks prior to or early in disease progression

Diagnosis

More accurately diagnose disease to improve outcomes and lower costs

Precision cancer care

Get treated based on your unique molecular causes of disease

Pharmacogenomics (PGx)

Optimize the right drug and right dose based on your unique genetic makeup

“ The expertise, dedication, and support from Jess at Genomic Life made me go from drinking from a fire house, feeling overwhelmed and lost to feeling confident, blessed, and in control of my life again. They are truly helping me battle this disease.
